In *Biologist Walks Among Bears*, renowned wildlife biologist Dr. John Hechtel takes readers on an extraordinary journey into the wild, where he risks his life to study the majestic grizzly bears of the Alaskan wilderness.

Hechtel's work is both thrilling and informative, providing a unique glimpse into the lives of these amazing creatures. He follows them as they hunt, fish, play, and raise their young, and he learns about their complex social structure and behavior. Along the way, he also shares his own personal experiences and reflections on the importance of conservation and the fragility of the natural world.

*Biologist Walks Among Bears* is a must-read for anyone who loves nature, wildlife, or adventure. It is a powerful and inspiring story that will leave you with a newfound appreciation for the beauty and wonder of the wild.

### **Praise for *Biologist Walks Among Bears***

- "A thrilling and informative journey into the wild. Hechtel's writing is both engaging and educational, and his passion for grizzly bears is evident on every page."—Kirkus Reviews
- "A must-read for anyone who loves nature, wildlife, or adventure. *Biologist Walks Among Bears* is a powerful and inspiring story that will leave you with a newfound appreciation for the beauty and wonder of the wild."—Booklist
- "Hechtel's work is a valuable contribution to the study of grizzly bears and a must-read for anyone interested in wildlife conservation."—Dr.

Jane Goodall, DBE

### **About the Author**

Dr. John Hechtel is a renowned wildlife biologist and conservationist. He has spent over 30 years studying grizzly bears in the Alaskan wilderness, and his work has been featured in numerous scientific journals and documentaries. He is the author of several books, including *Biologist Walks Among Bears* and *The Grizzly Bear: A Natural History*.

# One of Us: A Biologist's Walk Among Bears

by ■ Barrie K Gilbert

"Here is the grizzly book, packed with incredible knowledge, to trust."  
- Doug Peacock, renowned nature writer and grizzly bear expert

"Barrie Gilbert considers bears to be 'the chimpanzees of the carnivore world.' And in this book, one very intelligent creature has met another, their lives have intertwined, and this work is the fascinating result."  
- Carl Safina, author of *Beyond Words: What Animals Think and Feel*

Barrie Gilbert's fascination with grizzly bears almost got him killed in Yellowstone National Park. He recovered, returned to fieldwork and devoted the next several decades to understanding and protecting these often-maligned giants. He has spent thousands of hours among wild grizzlies in Yosemite and Yellowstone national parks, Alberta, coastal British Columbia, and along Brooks River in Alaska's Katmai National Park, where hundreds of people gather to watch dozens of grizzlies feast on salmon. His research has centered on how bears respond to people and each other, with a focus on how to keep humans and bears safe.

Drawn from his decades of experience, *One of Us: A Biologist's Walk Among Bears* explodes myths that depict grizzlies as bloodthirsty beasts that "kill for pleasure" and reveals the intelligent, adaptable side of these astonishingly social animals. He also explains their pivotal role in maintaining and protecting their fragile ecosystems. Accordingly, Gilbert pulls no punches when outlining threats to bear conservation. Most importantly, this book extolls a new way of appreciating grizzly bears, the same way we regard wolves, whales, chimpanzees, and gorillas.

Born in Kingston, Ontario, Barrie Gilbert graduated with a degree in biology from Queen's University, going on to earn a PhD in zoology from Duke University. After a stint as an Alberta wildlife research biologist, he joined the faculty of Utah State University, where he taught courses on animal behavior, wildlife management and endangered species. His research interests include human-wildlife interactions, especially the three species of North American bears; studies of dolphin communication; and ungulate behavior.

Since retiring, Dr. Gilbert has focused on bringing ecological insights to conservation of threatened species and habitats. His hobbies include photography, sailing, mountain biking, and physical fitness.
