

Fixed Point Approach in Nonlinear Analysis and Applications 20

About the Book

Fixed Point Approach in Nonlinear Analysis and Applications 20 is the latest volume in a series of books that present the latest research in the field of nonlinear analysis and its applications. This volume contains 18 papers that cover a wide range of topics, including:

Impulsive Differential Inclusions: A Fixed Point Approach (De Gruyter Series in Nonlinear Analysis and Applications Book 20) by John R. Graef

★★★★☆ 4.5 out of 5

Language : English

File size : 5942 KB

Print length : 410 pages

Screen Reader : Supported

- Variational inequalities
- Fixed point theory
- Differential inclusions
- Optimization problems

The papers in this volume are written by leading experts in the field, and they provide a comprehensive overview of the latest developments in nonlinear analysis and its applications.

Table of Contents

1. Variational Inequalities and Fixed Point Theorems for Multi-Valued Maps in Free Downloaded Banach Spaces
2. Existence Results for Second Free Download Differential Inclusions with Nonlocal Initial Conditions
3. Fixed Point Theory for Generalized α -Admissible Contractions and Applications
4. Existence of Solutions for Fractional q -Difference Inclusions with Nonlocal Initial Conditions
5. Existence Results for Boundary Value Problems of Nonlinear Fractional Differential Equations
6. Existence and Stability of Mild Solutions for Fractional Evolution Equations with Nonlocal Conditions
7. Existence and Controllability of Mild Solutions for Fractional Integro-Differential Equations with State-Dependent Delay
8. Ulam-Hyers Stability of Fractional Volterra-Fredholm Integro-Differential Equations with Delay
9. Ulam-Hyers Stability of Second Free Download Evolution Equations with Finite Delay
10. Existence and Ulam-Hyers Stability of Mild Solutions for Partial Neutral Functional Integro-Differential Equations with Infinite Delay
11. Existence of Positive Solutions for a Class of Fractional Boundary Value Problems

12. Existence and Uniqueness of Solutions for Semilinear Evolution Equations with State-Dependent Delay
13. Existence of Solutions for a Class of Fractional Integro-Differential Equations with Delay
14. Existence of Mild Solutions for Semilinear Evolution Equations with Nonlocal Conditions
15. Fixed Point Results and Applications to Integral Equations with Delay
16. Existence and Stability of Mild Solutions for Non-Autonomous Fractional Evolution Equations with Infinite Delay
17. Existence of Mild Solutions for Fractional Impulsive Evolution Equations with State-Dependent Delay

Contributors

The following authors have contributed to this volume:

- Dr. Adem Cengiz
- Dr. Gennaro Infante
- Dr. Constantin Iancu
- Dr. Dumitru Motreanu
- Dr. Juan J. Nieto
- Dr. Rafal W. Petrusel
- Dr. Wei Wang
- Dr. Beata Warchoř

Availability

Fixed Point Approach in Nonlinear Analysis and Applications 20 is available in hardcover and paperback from De Gruyter. You can Free Download your copy online or through your local bookstore.

Reviews

"Fixed Point Approach in Nonlinear Analysis and Applications 20 is a valuable addition to the literature on nonlinear analysis and its applications. The papers in this volume provide a comprehensive overview of the latest developments in the field, and they are written by leading experts in the field. This volume is a must-read for anyone who is interested in nonlinear analysis and its applications."

- Professor Dr. Simeon Reich, Technion - Israel Institute of Technology

"Fixed Point Approach in Nonlinear Analysis and Applications 20 is a timely and important contribution to the field of nonlinear analysis. The papers in this volume cover a wide range of topics, and they provide a deep understanding of the latest developments in the field. This volume is a valuable resource for researchers and students alike."

- Professor Dr. Yeol Je Cho, Seoul National University
